From the wide and green frontage, the welcoming spacious living area boasts a large skylight that lets plenty of natural light into the fully renovated home.

This shines through the simple but functional design, which reflects the thought the previous owners invested in making good use of the traditional sized block.

The home's charming open plan kitchen adjoins the dining and living room, with easy access to the rear patio.

The three bedrooms including a master bedroom of generous proportions, feature large built-in wardrobes and the design allows the natural light to accentuate the warm character of the home.
